MATH CLUB PRESENTS ACTUARIAL SCIENCE

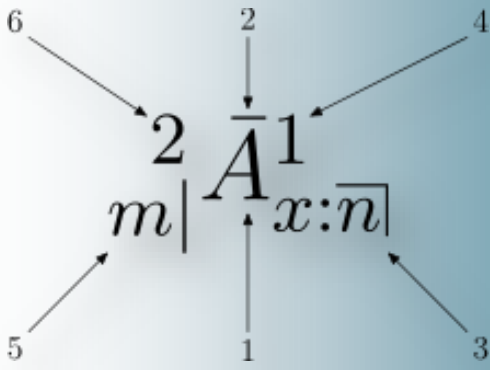

How much is two plus two?
 A marketing VP will say “22”
 An accountant will say “4.00”
 A mathematician will say “I can demonstrate it equals 4 with the following proof ... ”
 An actuary will ask “What do you want it to equal?”

Please help us welcome Dr. Krupa Viswanathan, the director of the Actuarial Science program, to present us with a brief introduction into the life of an actuary and their work. She

will make sure that our interest has only compounded continuously.

We will explore our responsibilities as an actuary and the kind of preparation it takes to be successful in this field.

The opportunities with a mathematical background are endless, like a perpetuity. .

Free PIZZA and refreshments!
The member who attends the most number of meetings will be given a PRIZE at the end of the year!!
